

○ Stone Grey Matt

Matt finishing – now with added inspiration.

**Discover Standocryl 2K System Clear Super Matt K9150
and Standocryl 2K System Clear Satin Gloss K9140**

Get Inspired

Match virtually **any matt colour** with our innovative new matt clearcoats.

Best in class system.

Colours and effects found on modern cars are often inspired by nature. Matching them, especially on ultra-low gloss levels, demands the true skill of a refinisher. It also requires best-in-class products – like our inspirational matt clear system based on the latest innovative Axalta technology.

High quality. Wide choice.

Alongside the widest range of gloss levels in the industry, the system also features easy handling and robust application for panel, multi-panel, and overall repairs. Achieve very good reproducibility and right-first-time results. Defined drying and flash-off times result in a homogenous matt surface with lasting quality. Matt vehicle repairs are now easier to achieve and are more energy efficient than before.

The right gloss level every time.

With our advanced digital colour management software Standowin iQ, the applicable gloss level is already recommended with the colour formula. And our Acquire spectrophotometer helps you identify the correct matt colour quickly and easily.

ENERGY SAVING
