

The hi-tech choice for optimal results.

Standofleet Industry.

The solution for industrial coating.

More and more bodyshops are including the painting of industrial objects to their services. The requirements for this are varied, ranging from coating different substrates to requests for certain degrees of gloss or effects.

The Standofleet Industry system can adapt to many applications while using a relatively small range of paint products.

A match for each application.

Standofleet Industry adheres to many substrates.

- Steel
- Zinc
- Aluminium
- Coated or pre-coated surfaces, e.g. coil coatings, powder coatings
- Wood
- Mineral substrates, e.g. concrete, roof tiles, floor/wall tiles
- Copper/brass
- Plastics

Identify colours the easy way.

Gloss and texture fans.

Get a rapid impression of the varied degrees of gloss and effects possible with Standofleet Industry.

Standomix Color Box.

The Standomix Color Box offers more than 3000 colours in chronological order. The large fans are painted with original material.

Digital colour measurement.

Featuring the latest LED technology and 3-angle measurement the Genius XS measures solid as well as effect colours allowing fast formula matching.

Standofleet Industry makes widely differing effects and degrees of gloss possible.

- From smooth to textured
- From high-gloss to dull matt

STANDOX

The Art of Refinishing.

The system depends on the application.

PUR

Standofleet Industry PUR Topcoat
Standofleet Industry PUR Matt Topcoat
Standofleet Industry PUR Tex Fine Topcoat

- 2K topcoat (polyurethane)
- High mechanical and chemical resistance
- For interior and exterior applications
- Suitable on primed substrates
- PUR: five degrees of gloss are possible, from high-gloss to matt
- PUR Matt for extremely matt surfaces
- PUR Tex Fine for textured surfaces

Acryl

Standofleet Industry Acryl 100 Topcoat

- Glossy 2K topcoat (polyacrylate)
- Very high UV-stability
- Five degrees of gloss, from high-gloss to matt

Single-stage Acryl

Standofleet Industry Unicryl Topcoat

- Glossy 2K topcoat (polyacrylate)
- For single-stage application without primer
- Applied straight onto steel, aluminium and galvanised substrates
- For interior and exterior applications
- Five degrees of gloss, from high-gloss to matt

Stonechip

Standofleet Industry Stonechip Topcoat

- 2K topcoat (polyacrylate)
- High mechanical strength
- Optimised for application with large devices

2K HS

Standofleet Industry 2K HS Topcoat

- Fast drying
- Safe processing
- Very good resistance
- Low material consumption

IRON MICA

Standofleet Industry Iron Mica Topcoat

- 2K topcoat (polyacrylate)
- High mechanical and chemical resistance
- Typical gloss and effect formation

Alkyd/synthetic resin

Standofleet Industry KH Topcoat

- High-gloss 1K topcoat (alkyd/synthetic resin)
- Suitable for interior and exterior applications
- Also suitable for rolling and brushing
- Synthetic resin accelerator improves hard drying and makes surface recoatable faster
- Five degrees of gloss, from high-gloss to matt

Epoxy

Standofleet Industry Epoxy Topcoat

- 2K epoxy system
- Suitable for special applications in interiors
- For objects with extreme surface hardness and high mechanical and chemical resistance, e.g. floors, machines
- Three degrees of gloss, from glossy to matt

Nitrocellulose

Standofleet Industry NKL Topcoat

- 1K topcoat (nitrocellulose)
- Suitable for interiors
- Rapid air drying
- Four degrees of gloss, from glossy to matt

1K Acryl

Standofleet Industry 1K Acryl Topcoat

- 1K topcoat (acrylic-based)
- Suitable for interior and exterior applications
- Very rapid air drying
- Five degrees of gloss, from high-gloss to matt
