UV-A speed surge for spot repairs.
Explore new opportunities with Standocure UV Filler U7150.

STANDOX

The Art of Refinishing.

An Axalta Coating Systems Brand

Make high quality spot repairs faster than ever.

Standocure UV Filler U7150 is an extremely fast UV filler – curing in just one minute. Easy to use, it also performs very well in terms of adhesion to ensure an excellent and long lasting finish. Use it to speed up your current spot repairs or open up a new revenue stream by offering customers a high speed repair service.

Innovative technology for highest performance.

With its state-of-the-art CMR-chemical-free formulation, this new filler gives you unprecedented speed in curing. It offers enhanced adhesion which means a better, longer lasting and high quality finish as well as better corrosion performance.

Maximum versatility unlocks new opportunities.

It is suitable for a wide range of applications – ideal for professionals seeking flexibility or new services to offer customers. It makes minor repairs more lucrative than ever and enables you to increase throughput in your bodyshop or refurb center. For more convenience, it is available as 1L can and 0,4L aerosol.

High efficiency for speed and savings.

Ready to use, Standocure UV Filler U7150's extremely fast application means higher productivity. And, since no baking is required, it saves energy too. This 1K product also requires minimal cleaning and produces minimal waste – a major plus for the environment.
