

**The Xtreme System:  
Remarkably fast drying time.**

An Axalta Coating Systems Brand

**The Art of Refinishing.**

# Xtreme unsurpassed.

The Xtreme System is the most innovative product of its kind on the market. It offers the shortest possible painting process, significant energy cost savings and exceptional results.

## 1. Xtreme innovative.

The patented Axalta technology speeds up processing. It uses both temperature and ambient humidity to accelerate the drying process.

## 2. Xtreme efficient.

The Xtreme System with Standoblue Basecoat provides for super short repair times of just 36 minutes. This makes it at least 50% faster than comparable products on the market. Even without forced drying, process time is just 75 minutes.

## 3. Xtreme faster throughput.

Say goodbye to bottlenecks: Spray booth times can be reduced by at least 25%, freeing up time for other jobs.

## 4. Xtreme quick turnaround for new parts.

Apply a filler coat to new parts in record time. The new VOC-Xtreme Wet-on-Wet Filler U7650 offers an astonishingly short flash-off time. In just 5 minutes it's ready for overcoating.

## 5. Xtreme fast clearcoat drying.

Standocryl VOC-Xtreme Clear K9580 offers remarkably fast drying times. The vehicle is ready to exit the booth in just 10-15 minutes at 40°C.
