New wet-on-wet filler for the Xtreme system

Standex is expanding its range of Xtreme products with the VOC-Xtreme Wet-on-Wet Filler U7650, developed to help you paint new parts quickly with a high-quality finish. Combined with the Standoblue basecoat, new parts can now be painted to a professional standard in just 36 minutes.

The Standox Xtreme system offers the unique advantage of short drying times. The three Xtreme products—Standocryl VOC-Xtreme Filler U7600, Standocryl VOC-Xtreme Clearcoat K9580 and the new VOC-Xtreme Wet-on-Wet Filler U7650—dry extremely quickly at 60°C or 40°C, and do not require forced drying even at 20°C. This makes the products amazingly versatile, since painters can choose whether to prioritise speed or low energy consumption when drying. Energy consumption is reduced by up to 70 percent when drying at 20°C. And Xtreme products reduce energy costs by up to 25 percent when using rapid oven drying too.

The distinguishing feature of Xtreme products from Standox is their extremely short drying times.

The new VOC-Xtreme Wet-on-Wet Filler boasts a short flash-off time, good stability on vertical surfaces and excellent topcoat holdout.

New filler with a flash-off time of just five minutes

The new VOC-Xtreme Wet-on-Wet Filler U7650 not only sets new standards with its rapid drying time, but also boasts excellent stability on vertical surfaces and an especially good topcoat holdout when painting new parts. Available in white, grey and black, the filler is easy and safe to apply and dries to a high-gloss finish once the topcoat has been applied. The filler can be painted over or even lightly sanded after just five minutes, which will significantly increase throughput in your workshop.

A speedy system with low energy consumption

With Standox Xtreme products, which are applied together with the Standoblue basecoat, the entire coated surface can be dried at 40°C or even 20°C with minimal energy consumption. Short drying times mean companies can offer their customers our "1 DAY REPAIR" service and return the vehicle the same day.
